

Nonexistent Syclones

In the past year all I have heard is "Have you seen the new GMC Syclone?" To tell you the truth, no. The only ones I have ever seen are either on television or in the pages of *Sport Truck*. I figured that I would have seen at least one, but I haven't. The town I live in is outside of Austin, Texas, and if there is a new truck out, someone will usually have one. I have driven by GMC dealers and I haven't seen one. I know they are a limited edition, but how many trucks have actually been built? How long have they been out, and has the Typhoon been released yet?

Gregg Geil, Pflugerville, Texas

Believe it or not, the Syclone does exist, there just seems to a lack of demand for it in your area. Or maybe the owners have been storing them away in their garages for investment purposes. That would be a shame, because it's a blast to drive. As far as production numbers, about 1500 '91 models were built, and the first Syclone was delivered over a year ago. By the time you read this, the Typhoon should be in full production, just let your dealer know you want one.
